

Boiler Inclusion Project Videos & Talking Points

The full (50-minute) Boiler Inclusion presentation was developed for implementation among incoming undergraduate students during Boiler Gold Rush, although it may be used in a variety of other contexts. The full presentation includes five short videos that may also be used individually. You may view these videos directly from this (i.e., the Purdue University, Diversity and Inclusion) website, or you may download the videos. Videos are available both with and without closed captioning. Each individual video is accompanied by a set of Talking Points.

The videos explore themes that psychological research suggests are pertinent to contemporary intergroup relations and inclusive behaviors. Thus, the videos are empirically-based, and the accompanying Talking Points likewise were written with the empirical literature in mind. Below are examples of empirical articles that were useful when crafting the videos and talking points.

- Ashburn-Nardo, L., Voils, C.I., & Monteith, M.J. (2001). Implicit associations as the seeds of intergroup bias: How Easily do they take root? *Journal of Personality and Social Psychology*, 81, 789-799.
